

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): ~~The use of the~~ A method for inhibiting adhesion of a plastic to a mold, the method comprising:

providing a compound $R_n^1 PO_3^\ominus (HN^\oplus - R_3^2)_m$ (I)

as a release agent during the cast polymerization of methyl methacrylate mixtures, ~~where~~ wherein:

R^1 = methyl, ethyl, propyl, isopropyl, butyl, isobutyl, pentyl, hexyl, heptyl, octyl, nonyl, decyl, undecyl, dodecyl;

R^2 = methyl, ethyl, propyl, isopropyl, butyl;

$n = 1$ or 2 ;

$m = 2$ or 1 ; and $n + m = 3$.

Claim 2 (Currently Amended): ~~The use of~~ The method of claim 1, wherein the use of the compound of the formula I is present in amounts an amount of 0.01 - 5% by weight, based on the weight of the polymerizable monomers or monomer mixture composed of (meth)acrylates and ~~of other~~; copolymerizable monomers, as the release agent.

Claim 3 (Currently Amended): ~~The use of~~ The method of claim 1, wherein the release agent ~~agents as claimed in claim 1 or 2~~ is useful for the production of plastics moldings composed of (meth)acrylates and ~~of other~~ copolymerizable monomers.

Claim 4 (Currently Amended): A plastics molding composed of (meth)acrylates and ~~of other~~ copolymerizable monomers, comprising: ~~compounds~~
a compound of the formula I

as a release agent during the cast polymerization of methyl methacrylate mixtures,

wherein:

R¹ = methyl, ethyl, propyl, isopropyl, butyl, isobutyl, pentyl, hexyl, heptyl, octyl,

nonyl, decyl, undecyl, dodecyl;

R² = methyl, ethyl, propyl, isopropyl, butyl;

n = 1 or 2;

m = 2 or 1; and

n + m = 3.
